

Ghost Train Skeleton Template

Print the template on the next page onto thin white card or paper. Cut out the pieces carefully. NB this should be done by an adult as it will require sharp scissors and precision. Once the pieces are ready your child can arrange them to make a skeleton and then either stick the skeleton onto a dark background or clip the pieces together using split pins.

NB This template is inspired by Andre Amstutz' images in Ghost Train but it is not intended as a faithful representation and is intended to enhance enjoyment of the book. It is also not attempting to be anatomically accurate.
